

TECHNICAL FIELD BULLETIN

Date February 2004
Subject New Feature in NKL Edge 2.0.5 / Edge Plus 3.0.5
Issue By NKL Cash Handling - a member of FKI Security Group
Issue To New Edge/Edge Plus Customers and BDMs
Document 40205

OVERVIEW

NKL Edge and Edge Plus software packages have been revised to include a new feature, starting with Edge 2.0.5 and Edge Plus 3.0.5. Rather than burning a copy of Edge/Plus software for each specific customer with the customer's "Serial" number built in, the customer must call and obtain an "override" to activate the software. Part of the process includes setting the software "Serial" number. The software will only communicate with a safe set to the same serial number. Users upgrading from previous versions usually will not need to call the factory as indicated below.

PRODUCTS AFFECTED

NKL Edge: NKLEdge.exe updated to Version 2.0.5.
NKL Edge Plus: NKLEdgePlus.exe updated to Version 3.0.5.

ACTION REQUIRED

When a user installs NKL Edge or Edge Plus for the first time, upon completing the software installation, contact NKL Technical Service (8 am to 10 pm E.T.) at 1-800-452-4655 to activate the software. A technician will walk you through "Override 31" to activate the software.

ADDITIONAL INFORMATION

If you have any questions or problems with the software contact NKL Technical Support at 1-800-452-4655. You can also check for more information about this update or any other product updates any time at www.fkitechinfo.com.
