Document 80802-1010

## OVERVIEW

This full-production release (3.53) includes the following updates found in limited releases since the last full-product release (3.411):

- Corrected Vend Till timing problem (3.412)
- Added support for financial values in millions (3.51)
- Added Euro option (requires correct JCM validator) (3.51)
- Enhanced bill counts for better accuracy (3.52)
- Added "Total Buy Validated" and "Total Buy Vend" fields to EOD, Grand X and Operator Reports (3.52)
- Added Full and Almost Full warnings when using BNF validators (3.53):
  - When validator reaches 1500 notes: operator receives status screen when making drop; drop is allowed; "almost full" is recorded in the audit.
  - When one validator on a V2 reaches 1750 notes (theoretically full assuming "street" currency): operator receives screen indicating validator is full; operator is allowed to complete drop; "full" status reported in audit; warning reported on cash report.
  - When all validators on a specific safe reach 1750 notes (theoretically full assuming "street" currency): operator receives screen indicating validator is full; operator is not allowed to complete drop and is instructed to instead make a manual drop; "full" status reported in audit; warning reported on cash report.
